

Thank you for purchasing FreqTube FT1-EMU plugin.

Your license is ready and you can now download and activate the plugin.

1. Create Your Freqport Portal Account (Recommended)

For easier software updates, product management and future downloads, we recommend creating your Freqport Portal account.

An account has already been created for you based on your purchase. You should receive a separate email with a link to set your password and complete the activation.

Once you set your password, you will be redirected to the Freqport Portal, where you can download the installers, manage your products, and access future updates.

Once logged in:

1.1. Download the installer for your system.

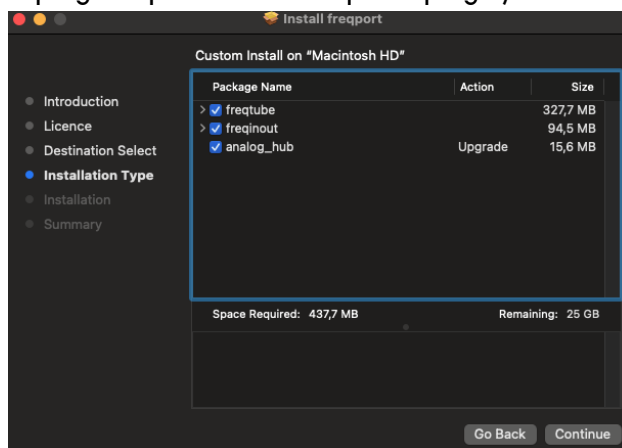

Choose your system:

[• Download for Mac](#)

[• Download for Windows](#)

The installer includes:

- AnalogHub
- FreqInOut Drivers
- FreqTube FT1 + FT1-EMU plugin
(the EMU plugin is part of the FreqTube plugin)

⚠ Windows Users

Please unzip and extract the installer before running it.

1.2. Check section Products → Registered Products

freqport.com/freqportal/registred-products/

1.3. Select FreqTube FT1-EMU

and copy your **licence number** to redeem in iLOK

2. Download Without Creating an Account

If you prefer not to create a portal account, you can download the installer directly:

freqport.com/downloads/

3. Activate Your License

FreqTube FT1-EMU uses iLok licensing.

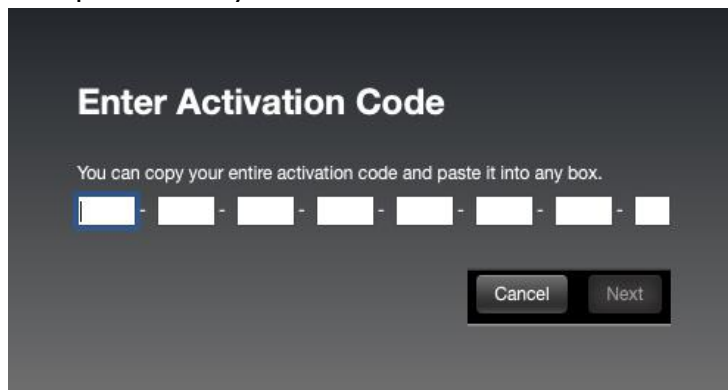

1. Create a free account at ilok.com
2. Download and install iLok License Manager
3. Open iLok License Manager

Login and locate the little dots in the upper right corner.

4. Redeem your license key

Now paste the key here

and hit next, you should now see the Freqtube License in your activated tab

5. Open up your DAW, locate the Freqtube plugin and start using it.

6. You can also activate the plugin from the DAW when opening for the first time, but the ILOK protection can "blacklist" the plugin if the activation is aborted.

Look up your DAW if this happens, and look for "Force Plugin Rescan"
